## 1. INTRODUCTION

The website is operated and owned by Leverate Financial Services Ltd (the ‘Company’), a financial services company incorporated according to the laws of the Republic of Cyprus, Registration number 290182, having its registered office at 88 Agias Fylaxeos street, Zavos City Centre, 3025 Limassol, Cyprus. The Company operates under license number 160/11, issued in Cyprus by the Cyprus Securities and Exchange Commission whose offices are located at 19 Diagorou Street, 1097 Nicosia, Cyprus (the ‘CySEC’).

This Order Execution Policy (hereinafter “the Policy”) is issued pursuant to, and in compliance with the Law, the Directive 2014/65/EU of the European Parliament and of the Council of 15 May 2014 on Markets in Financial Instruments (‘MiFID II’) which was transposed into Cyprus Law, the Investment Services and Activities and Regulated Markets Law of 2017 (Law 87(i)/2017).

## 2. SCOPE

When dealing with Clients, the Company has a general duty to act honestly, fairly and professionally and in the best interest of the Client. In relation to order execution, the Company is required by the Law to take all sufficient steps to obtain the best possible result on behalf of its clients when providing to them the Investment Services that the Company is licensed to provide.

## 3. CLIENT CATEGORIZATION AND ORDER EXECUTION

The Company is authorised to execute orders on Clients’ behalf and to receive and transmit orders on Clients’ behalf. Reception and transmission of orders includes arrangements that bring together two or more investors. By executing orders on Clients’ behalf, the Company participates in the execution of an order on behalf of the Client, by transmitting that order to a third-party (“Execution Venue”). The present policy applies to only to Retail and Professional Clients, it does not apply to Eligible Counterparties.

## 4. BEST EXECUTION FACTORS

The Company takes all sufficient steps to act in the best interest of its Customers when executing Customer’s Orders and obtain the best possible result for Customers taking into account the following factors when dealing with Customers Orders: price, cost, speed, likelihood of execution and settlement, size, nature and other considerations of the

transaction, market impact or any other consideration relevant to the execution of an order as applicable.

The Company does not consider the above list exhaustive and the order in which the above factors are presented shall not be taken as priority factor.

The Company when executing Clients' Orders is required under the relevant regulatory framework to assign a relative importance on the following execution factors:

- a. Price:** For the Company's Financial Instruments the Company will quote two prices: the higher price (ASK) at which the Client can buy (go long), and the lower price (BID) at which the Client can sell (go short).

Collectively, the ASK and BID prices are referred to as the Company's price. The difference between the lower and the higher price of a given Financial Instrument is the spread. Such orders as 'Buy', 'Buy Limit', 'Buy Stop' orders will be opened at the ASK price and closed at BID price, and 'Sell', 'Sell Limit', 'Sell Stop' will be opened at the BID price and closed at ASK price. The Company's prices can be found on the Company's website and/or trading platforms. The Company updates its prices as frequently as the limitations of technology and communications links allow. The Company reviews its third-party external reference sources in frequent periods to ensure that the data obtained continues to remain competitive. The Company will not quote any price outside the operations time of the Company's trading platform for trading in any particular financial instrument (as indicated on the Company's website; therefore, no orders can be placed by the Client during that time. Without notice, the Company reserves the right to cancel the trades and profit or loss generated from them if the trades were executed outside trading hours via any means.

- b. Costs:** For opening a position in some types of instruments that the Company offers the Client may be required to pay a mark-up on spread and an overnight financing fee ("swap") if the Client wishes to hold his position overnight.

The amount of the costs is disclosed on the Company's website and/or trading platforms. Commissions may be charged either in the form of a percentage of the overall value of the trade or as fixed amounts. Currently Company charges 0.5% commission, subject to change, on trading CFD's on Stocks (World Shares) and Crypto Currencies. In the case of financing fees, the value of opened positions in some types of CFDs is increased or reduced by a daily financing fee "swap rate" throughout the life of the contract. Financing fees are based on prevailing market interest rates, which may vary over time. Details of daily financing fees applied are available on the Company's website and/or trading platforms. For all types of Financial Instruments that the Company offers, the commission and financing fees are not incorporated into the Company's quoted price and are instead charged explicitly to the Client account.

- c. Speed of Execution:** Due to the levels of volatility affecting both price and volume, the Company seeks to provide Client orders with the best execution available. The Company places a significant importance when executing Client's Orders and strives to offer high speed of execution within the limitations of technology and communication links. In case where the Clients use a wireless connection or a dial up connection or any other communication link that can cause a poor internet connection, which can cause unstable connectivity with the Company's trading platform, resulting to the Client placing his orders at a delay and the orders being executed at a better or worse prevailing price offered, the Company does not accept any liability in case of such incident.
- d. Likelihood of Execution:** There would be cases where it may not be possible to arrange the order for execution. That is because we rely on third-party Liquidity Providers for prices and available volume. Therefore, the execution of Clients' orders will depend on whether there are prices and liquidity available at the time these orders are received. The availability on execution may be subject to variation, especially during abnormal market conditions, such as:
- i. During market opening times
  - ii. During times of market news and events
  - iii. During periods of significant volatility
  - iv. Where there is a rapid price movement
  - v. Where there is insufficient liquidity for the execution of the specific volume at the declared price or a force majeure event has occurred.
  - vi. Where the Company's internal risk limits no longer permits the acceptance of any further orders on a specific instrument
- e. Likelihood of settlement:** The Financial Instruments of CFDs offered by the Company do not involve the delivery of the underlying asset, so there is no settlement.
- f. Size of Order:** The minimum size of an order may be different for each asset type and/ or financial instrument. A Lot is a unit for measuring the transaction amount and is different for each type of CFD. Please refer to the website and/or platform for the value of minimum size of an order or minimum Lot for a given CFD. The Company reserves the right to decline an order as entered with the Client.
- g. Market Impact:** Some factors may rapidly affect the price of the underlying instruments/products from which the Company's quoted price is derived and may also affect other factors listed herein. The Company will take all reasonable steps to obtain the best possible result for its clients.
- h. Partial Fills:** This is the practice of executing an order in parts if there is not enough liquidity in the market at the time in order to fill-in the full order at a specific price. Partial fills may be executed at different prices.

## 5. BEST EXECUTION CRITERIA

The relative importance that the Company attaches to the execution factors in any particular case may be affected by the circumstances of the order. They are called the Execution Criteria and they consist of:

- a. Client Characteristics – Professional Clients may have different needs than Retail Clients.
- b. Transaction Characteristics – Such as the potential for it to have an impact on the market.
- c. Financial Instrument Characteristics – such as liquidity and whether there is a recognized centralized market.
- d. Venue characteristics – particular features of the liquidity sources available to the website
- e. Other relevant circumstances – as applicable.

For Retail Clients, the best possible result shall be determined in terms of the total consideration, representing the price of the financial instrument and the costs related to execution, which shall include all expenses incurred by the Client which are directly related to the execution of the Order and any other fees paid to third parties involved in the execution of the order.

For the purposes of delivering best execution where there is more than one competing execution venue to execute an order, in order to assess and compare the result for the client that would be achieved by executing the order on each of the execution venue that is capable of executing that order, the Company's own commissions and costs for executing the order on each of the eligible execution venue shall be taken into account in that assessment. The Company shall not structure or charge commissions in such a way as to discriminate unfairly between the execution venue.

The Company determines the relative importance it assigns, in accordance with the abovementioned criteria, to the Best Execution Factors by using its commercial judgement and experience in light of the information available on the market and by taking into account the remarks included in paragraph 4. The Company assigns the following importance level to the Best Execution Factors:

Factor	Importance Level	Remarks
Price	High	We give strong emphasis on the quality and level of the price data that we receive from external sources in order to provide our clients with competitive price quotes. We do not however guarantee that our quoted prices will be at a price which is as good or better than one might have been available elsewhere
Costs	High	We take all sufficient steps to keep the costs of your transactions as low and competitive, to the extent possible. Additional costs might be charged by the Company's Liquidity Providers
Speed of Execution	High	Execution Speed and the opportunity for price improvement are critical to every trader and we repeatedly monitor these factors to ensure we maintain our high execution standards
Likelihood of Execution	High	Even though we reserve the right to decline a Client Order we aim to execute all Client orders, to the extent possible.
Likelihood of Settlement	Medium	See relevant description in Paragraph 4
Size of Order	Medium	See relevant description in Paragraph 4
Market impact	Medium	See relevant description in Paragraph 4
Partial Fills	Medium	See relevant description in Paragraph 4

## 6. OTHER KEY ASPECTS OF THE FIRM'S EXECUTION ARRANGEMENT

- a. **Slippage:** This situation occurs when there is latency between the quoted and executed price. Latency can lead to slippage i.e. the difference between the expected price of an order, and the price the order is actually executed at. Negative slippage occurs when the executed price is worse than the price requested by the Client. Positive Slippage occurs when the execution price is better than the price requested by the Client. Slippage is more likely to occur in the forex market when volatility is high, perhaps due to news events, or during times when the currency pair is trading outside peak market hours. Additionally, slippage can occur both to market and pending orders. Pending orders will be executed at the next best available price. As part of monitoring its best execution, the Company ensures that it does not apply asymmetric slippage to its clients.
- b. **Requotes:** This is the practice of providing a secondary quote to the Client after an 'Instant Order' (as defined below) has been submitted; the Client must agree to this quote before the order is executed; the Company will requote 'instant orders' (as defined below) if the requested price originally specified by the Client is not available; the secondary quote provided to the Client is the next available price received by the Company from its third party price providers/liquidity providers; the Company does not re-quote 'Pending Orders' (as defined below).

## 7. TYPES OF ORDER(S) IN FINANCIAL INSTRUMENTS OFFERED BY THE COMPANY

The Company's clients can place the following orders with the Company:

- a. **Market Order:** A Market Order is an order to buy or sell a Financial Instrument at the current price. Execution of this order results in opening a position. Financial Instruments are bought at the ASK price and sold at the BID price. Stop Loss and Take Profit Orders can be attached to a Market Order. Market Orders are offered for all types of accounts and Financial Instruments.
- b. **Good 'till Cancelled (GTC) (=Expiry):** This is an execution setting that the Client may apply to 'Pending Orders' (as defined below). The order may remain 'live' and pending for execution until such time as the order is triggered and treated as a Market Order or cancelled by the client.
- c. **Instant Order:** : this is an order to either buy or sell at the 'ask' or 'bid' price (respectively) as it appears in the quotes flow at the time the client presents the order for execution ("Instant execution"); in Instant Execution, if the requested price is not available (allowing for a plus or minus pre-specified deviation), the next available price will be sent to the client to confirm execution (re-quote); Stop Loss and Take Profit Orders can be attached to an Instant Order; In cases that the Company's trading platform(s) provide(s) an option to the Client to choose Instant Execution, the Client's order will be executed as described hereinabove.
- d. **Pending Order(s):** The Company may offer the following types of Pending Orders:
  - **Buy Stop:** this is an order to buy a specific quantity of the underlying instrument with the triggering price ('the stop price') being higher than the current market price (upon triggering the order becomes Market Order).
  - **Sell Stop:** this is an order to sell a specific quantity of the underlying instrument with the triggering price ('the stop price') being lower than the current market price (upon triggering the order becomes Market Order).
  - **Buy Limit:** this is an order to buy an instrument at a specified price ('the limit price') that is lower than the current market price (can only be executed at declared or better price).
  - **Sell Limit:** this is an order to sell an instrument at a specified price ('the limit price') that is higher than the current market price (can only be executed at declared or better price).
  - **Stop Loss:** this is an order that may be attached to an already open position or a pending position to exit the trade at a specified price ('the stop loss price'). A 'stop loss' may be used to minimize losses, upon triggering it becomes a market order and can be executed at declared, better or worse price.
  - **Take Profit:** this is an order that may be attached to an already open position or a pending position to exit the trade at a specified price ('the take profit price'). A 'take profit' may be used to secure profits and can only be executed at declared or better price.

## 8. EXECUTION OF ORDERS:

The transactions entered in Financial Instruments with the Company are not executed on a Trading Venue (Regulated Market, Multilateral Trading Facility, Organized Trading Facility), rather they are executed by the Company, through its Electronic Trading Platform, which is NOT a Trading Venue and as such may expose the Client to greater risk rather than those of a Trading Venue. Therefore, the Company may not execute an order or may change the opening (closing) price of an order in case of a technical failure of the Trading Platform or of quoted fees.

The Company executes each order by always being the Client's counterparty. The Company acts as the principal, but it may transmit orders for execution to a third party (i.e. Liquidity Provider). The Company shall not receive any remuneration, discount, or non-monetary benefit for routing client Orders to a particular execution venue which may lead to a conflict of interest. The company will not pay or be paid any fee or commission, or provide or be provided with any nonmonetary benefit in connection with the provision of an investment service or an ancillary service, to or by any party except the client or a person on behalf of the client, other than where the payment or benefit:

- a. is designed to enhance the quality of the relevant service to the client; and
- b. does not impair compliance with the investment firm's duty to act honestly, fairly and professionally in accordance with the best interest of its clients.

## 9. TRANSACTIONS WHERE BEST EXECUTION HAS LIMITED SCOPE – SPECIFIC INSTRUCTIONS

When the Client give to the Company specific instructions in relation to the execution of a particular order, the Company executes the order according to the Client's instructions and in doing so the Company has delivered Best Execution in respect to the relevant aspect of the order that is subject to the Client's instructions. However, the Client's specific instructions may affect the Company's ability to follow the execution policy and the criteria set in the policy.

The Client acknowledges and accepts that these specific instructions may contradict the Company's Execution Policy and may not necessarily lead to best execution of his orders. Subject to the specific instructions given by the Client, the Client accepts that the Company will not be held liable for any direct or indirect loss or damage that may result from the execution of his orders. Risks and consequences are to be borne exclusively by the Client.

## 10. EVENT OF CLIENT DEFAULT OR OTHER LIQUIDATION EVENT

In an event of Client Default (e.g. insufficient margin), or other liquidation event, the Company shall seek to immediately terminate, cancel and close-out all or part of any outstanding positions. The Company retains discretion as to how to handle the close-out, including with respect to order execution, fill quantity, aggregation, priority and pricing.

## 11. MONITORING AND REVIEW

The Company has processes and procedures which analyze the execution quality and monitor best execution. The Company monitors and measures the competitiveness of its prices and the speed of its execution against other Forex Brokers.

The Company's second and third line of defenses, namely the Compliance and Internal Audit perform additional reviews and assessments on best execution on a regular basis and at least annually or whenever a material change occurs that affects the Company's ability to continue obtaining the best result for Clients' orders.

## 12. OTHER IMPORTANT INFORMATION

For CFDs specific Leverage restrictions apply for Retail Clients. For Professional Clients these restrictions do not apply.

Publication on our website of information on execution venues and data quality of execution on transactions

In accordance with the Commission Delegated Regulations (EU) 2017/575 and 2017/576, the Company shall publish, on its website information on the identity of execution venues and on the quality of execution on an annual basis. You can find the relevant report on the Company's website in the legal documents section.

## 13. IMPORTANT DISCLOSURES

In cases where the Company acts as an STP Broker (i.e. places the clients' orders for execution to third party liquidity providers), the Company undertakes to summarise and make public on an annual basis, for each class of financial instruments, the top five execution venues in terms of trading volumes where the client orders were executed in the preceding year and

information on the quality of execution obtained, in accordance to the relevant regulatory requirements.

The Company publishes an annual Execution Quality Summary Statement (EQSS) which for each class of financial instruments, includes a summary of the analysis and conclusions the Company will draw from its detailed monitoring of the quality of execution obtained on the execution venues where all client orders were executed in the previous year.

The EQSS includes:

- a) an explanation of the relative importance the Company gave to the execution factors of price, costs, speed, likelihood of execution or any other consideration including qualitative factors when assessing the quality of execution;
- b) a description of any close links, conflicts of interests, and common ownerships with respect to any execution venues used to execute orders;
- c) a description of any specific arrangements with any execution venues regarding payments made or received, discounts, rebates or non-monetary benefits received;
- d) an explanation of the factors that led to a change in the list of execution venues listed in the firm's execution policy, if such a change occurred;
- e) an explanation of how order execution differs according to client categorisation, where the Company treats categories of clients differently and where it may affect the order execution arrangements;
- f) an explanation of whether other criteria were given precedence over immediate price and cost when executing retail client orders and how these other criteria were instrumental in delivering the best possible result in terms of the total consideration to the Client;
- g) an explanation of how the Company has used any data or tools relating to the quality of execution, including any data published under Delegated Regulation (EU) 2017/575;
- h) where applicable, an explanation of how the Company has used output of a consolidated tape provider established under Article 65 of Directive 2014/65/EU.

**The EQSS Annual report is to be published by the 30th of April each year on following link: <https://fxpn.eu/legal-information/> (RTS 28 report).**

In cases where the Company acts as the execution venue for its clients' orders, it will publish every quarter on its website a report that will contain data of the execution quality (i.e. details about price, costs, speed and likelihood of execution for every individual financial instrument offered) based on the relevant regulatory requirements, as follows:

- a) By 30 June, information regarding the time period 1 January to 31 March;
- b) By 30 September, information regarding the time period 1 April to 30 June;
- c) By 31 December, information regarding the time period 1 July to 30 September;
- d) By 31 March, information regarding the time period 1 October to 31 December;

The report is published here: <https://fxpn.eu/legal-information/> (RTS 27 report).

**Note:** RTS 27 & RTS 28 report will be published on websites so as long the regulator needs the broker to do so.
